Come and visit the Land of the wide and open Spaces!

Farm Garib, 18000ha of pristine hunting area, was founded in 1910 by Hans Lühl from Westphalia and borders the vast Kalahari. Currently the cattle ranch boasts healthy populations of Kudu, Oryx, Red Hartebeest, Warthog, Springbuck, Duiker and Steenbok and a large variety of predators and huntable game birds.

Garib forms part of the "Dordabis Conservancy" which was established 1997 and includes 22 farms with an area of 160000 ha. Further species can be hunted on neighbouring farms on request. The principle aim of such a conservancy is to facilitate free movement of game across ranch borders, which ensures sustainable trophy hunting in the area.

Guests are accommodated in a separate farmhouse situated on the farmyard with three bedrooms. Two single rooms are available additionally. Guests can laze on their private veranda, or relax in the spacious lounge. Only one group is taken at a time to ensure a more personal service to our guests.

Meals are served in the old farmhouse and consist mainly of game-meat dishes and self produce.

For Hunters staying a longer period, we can organize a trip to our second farm Kaukurus in the east of the country.

For the non-hunter we offer day-trips to craft shops in the vicinity (Carpet-weavers and jewellers). Day flights in fixed-wing aircrafts to the Namib Desert or Fish-River Canyon can be organized on request.

Why not experience a hunt in the jewel of Africa called Namibia? We would be honoured to be your hosts.

Information

Destination: Guests are received at the Hosea Kutako international airport and arrive on Garib one and a half hours after arrival.

Weather: Sunshine is the order of the day. Occasional thunderstorms are to be expected between February and April. May to August are months of warm dry days and cold nights. Warm to hot conditions will be expected between September and November.

Personal Gear: Sturdy shoes or custom safari boots are necessary, but should not be too heavy. Clothing should be practical with a dark colour tone. A pullover and a windbreaker should be included for cooler evenings. Very important is a wide brimmed hat, sun block and of course you're hunting gear! In case of prescription medicine, you should bring along sufficient supply.

Hunting Season: It starts the 1.st of February and ends the 30.th of November. Due to the Namibian hunting law, a hunter is allowed to shoot two head of each species. Wounded game, which is not found, even after a long follow up, will have to be paid by the hunter. Bird shooting: The seasons are adjusted according to the rainfall each year.

Firearms: Handguns may not be imported to Namibia. Firearm owners should be in possession of valid firearm licence. Recommended calibres range from 7*64 or 30.06 with a bullet weight of at least 11,5 g / 180 grain. Rifles with a flat trajectory perform better due to long shooting distances. A four to six time magnification is sufficient for riflescopes. Firearms can also be hired on request.

Trophies: Cleaning and bleaching is done on the farm and takes about four to six weeks. Then we will take the trophies to the international forwarding agent. Professionals will do mounts of the trophies.

Insurance: Being concerned for your safety whilst on the farm, we strongly advise you to attain a detailed travel insurance, which covers trauma, illness, legal procedures, theft etc.

To cover your personal interests, we would greatly appreciate an early contact. We strive to answer any question on your part to make special arrangements if necessary so that the trip will be an unforgettable and enjoyable experience.
